Mrs Kabbani

The Traffic

It was gridlocked. Everyone turned off their engine, drivers wandered on the road asking what had happened. Then came the sirens, police, fire and ambulance. A helicopter flew low over head and began to land a mile further up, everyone knew it would be a long wait.

Which word means:

Traffic that is not moving?

To walk slowly?

What did everyone do to their cars?

What did the helicopter do after flying over?

What do you think has happened?
